

October 25, 2006 ENERGY STAR® DTA Stakeholder Meeting Action Items

1. EPA: Will issue a first Draft ENERGY STAR DTA specification in mid-November
2. CEA: Will ask manufacturers if they would be willing to modify auto-power down language to say '4 hours **or less**'
 - a. Does EPA have documents available on 'lessons learned' from computer management? Yes – there are core fundamentals that can be carried over to DTAs; relevant lessons learned will be shared with CEA
3. EPA: Will look at CEB-12 which provides guidelines for EPGs and talk to stakeholders about potential power implications
4. EPA and CEA: Will match up IEC and CEA nomenclature
5. EPA: Will determine how to move forward with a draft NTIA DTA product definition in the ENERGY STAR specification
6. EPA: Will work to determine savings estimates for DTAs
7. All: Those interested in seeing the Draft CEA-2022 standard should join the CEA working group
